The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/576,045	<b>Applicant(s)</b> NI ET AL.	
	<b>Examiner</b> SUN JAE Y. LOEWE	<b>Art Unit</b> 1626	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 10 August 2010.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 10, 2010 has been entered.

### ***Response to Arguments***

2. Applicant's remarks have been fully considered, however, they are not persuasive. Below are responses to Applicant's remarks.

Applicants have argued that the prior art compound is not an antiviral agent like the compounds of the instant claims. Therefore, a prima facie case is not made because a finite number of identified, predictable solutions is not met. This argument has been considered, however, it is not found to be persuasive. The prior art compound has pharmacological activity towards the 5HT receptor. Therefore, one of ordinary skill would have a reasonable expectation of success in producing another compound with pharmacological activity towards the 5HT receptor. The motivation would be to produce a compound with pharmacological activity towards the 5HT receptor, not an antiviral agent. The compound itself is obvious over the prior art, notwithstanding the different utility.

Applicants further argue that there is no motivation to chose the prior art compound. Applicants further argue that there is no reason to modify the prior art compound in the manner noted. This argument is not found to be persuasive. The prior art describes a small genus of compounds, and a specific embodiment (ie. the cited compound) for the treatment of headache. The prior art compound and the instantly claimed compound are positional isomers. Positional isomers are of close structural similarity, so one of ordinary skill would have reasonable expectation of success as well as motivation.
